

indaGO WAREHOUSE CONTROL SYSTEM

indaGO

**DRIVE YOUR
FULFILLMENT
ON ONE PLATFORM**

SOLUTIONS OVERVIEW:

DMW&H's indaGO Warehouse Control System streamlines your distribution center with a uniformed interface, offering you the flexibility to adapt to any technology. Able to easily integrate with order fulfillment technologies, enterprise resource planning (ERP) systems, and warehouse management systems (WMS). This order fulfillment software controls your automated distribution center, communicating between the WMS and all the material handling equipment to create an efficient fulfillment process.

KEY BENEFITS:

- Single solution that ties all fulfillment processes into one integrated system
- Seamlessly integrates and automates wave planning, batch or discrete order picking, order consolidation, packing, parcel manifesting, and shipping
- Direct operations to pick, label, sort, consolidate orders, manage tasks, manifest shipping, and handle returns
- Flexible fulfillment for slow, medium, and fast-moving products
- Uses the most efficient methods for pallet, case, and item routing

ACTUAL RESULTS

- Manages real-time material handling automation
- Maximizes system throughput and performance
- Flexibility to adapt to new technologies
- Balance warehouse picking efficiency
